PRODUCT PROCEDURE NOTE: Refer to product insert for complete instructions, limitations, and warnings. For healthcare professionals including professionals at point of care sites. Immunoassay for in vitro diagnostic use only. This assay provides only a preliminary analytical test result. A more specific alternate chemical method must be used in order to obtain a confirmed analytical result. Gas chromatography-mass spectrometry (GC-MS) is the preferred confirmatory method. Clinical consideration and professional judgment should be applied to any drug of abuse test result, particularly when preliminary positive results are indicated.
