iCup Drug Screen Procedure Card

1. Remove cap.
2. Donor provides specimen.
3. Technician replaces and secures cap while the cup is on a flat surface.
4. Check cap for tight seal. Technician dates and initials the security seal and places security seal over cap.
5. Technician peels off the label.
6. A photocopy of the results can be made by placing the entire cup with the card face down on the copier.

Read results at 5 minutes.

Example: Test shows positive for Opiates on a 10-panel iCup

All positive results are presumptive and should be confirmed by an alternative method (e.g., GC/MS).
